### **DETAILED ACTION**

0.1 This office action is in response to Notice of Appeal filed on 8/22/2005. Claims 1-43 are pending.

### **REASONS FOR ALLOWANCE**

1. After further search and thorough examination of the present application claims 1-43 are found to be in condition for allowance over the prior art of record.
2. The following is an Examiner's statement of reasons for allowance: the claimed invention provides a mechanism to repair memories by utilizing the least significant bit of storage to store more significant information when the memory cell for the more significant information is faulty.

To achieve the inventive goal, independent claims 1, 9, 15, 20, 26, 32 and 38, identify the distinct features "a repair router to utilize the least significant data bit of at least one of the plurality of addresses to hold non-least significant information from any of the plurality of non-least significant data bits and to discard least significant information"

The first cited reference, Nishikawa (U.S. Pat. No. 5,805,604) discloses a memory circuit having a plurality of regions for reading and writing data. The second cited reference, Shichiku et al. (U.S. Pat. No. 6,317,817) disclose an image operation processing apparatus that processes data packet including instruction information and an address of a prescribed address space.

However, none of the cited references, either singular or in combination teach or fairly suggest to discard the least significant bit of the repair router input data bus.

Art Unit: 2133

These limitations, in conjunction with all other limitations of the base claims were not shown by, would not have been obvious over, would have been fairly suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
